STOREFRONT, CURTAINWALL & ENTRANCES
DEPENDABLE

Date: **01/30/2009**

Engineering Bulletin: **010902**

Effective Date: **02/16/2009**

Released By: **Darryl Sample**

Subject: **Vent Framing**

Description: Tubelite will begin using a new extruding for casement vents. This frame component is 1/2" wider thus allowing for more material between the hinge and system frame for the caulk joint. This extrusion will become the standard for CW 3700 and the old extrusion will become optional. Glass sizes will be decreased by 1". We will also begin using a new butt hinge for the CW 3700.

The new extrusion will be optional on VW 3700 and HW3700 to maintain sight lines on multi style vent projects.
