DEPENDABLE

LEADERS IN ECO-EFFICIENT STOREFRONT,
CURTAINWALL AND ENTRANCE SYSTEMS

Engineering Bulletin: **ECR00187**

Communication Date: **4/10/2019**

Effective Date: **Immediately**

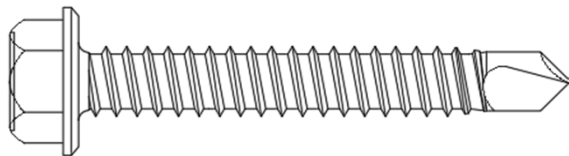

Released By: **Greg Hall**

Systems Affected: **400TU**

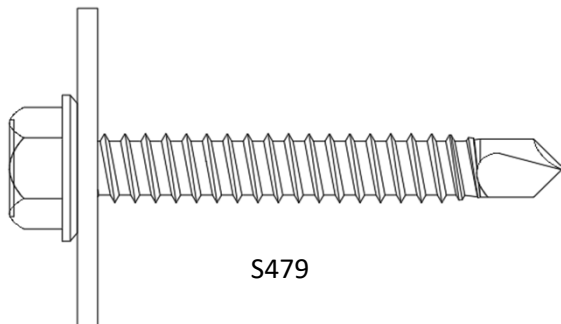

Subject: **S425-OR and S479-OR pressure
plate screws for 400TU**

The 400TU curtain wall system will now use the S425 pressure plate screw with aluminum pressure plates and the new PTB120 thermal pressure plate. This screw will provide better torquing and is more resistant to stripping than the S400-OR. When polyamide pressure plates are required, the S479 is used, which is the combination of the S425 screw plus the S437 flat washer.

Updates to the online Perimeter Sheets, Price Book and Installation Instructions are in process. The S425 and S479 are now available for ordering.
