

<<May 1, 2017>>

Valued customer:

Tubelite continues to focus efforts on meeting market and customer needs.

Towards that goal, we will be transitioning the standard default offerings for the T14000 and T24650 framing systems.

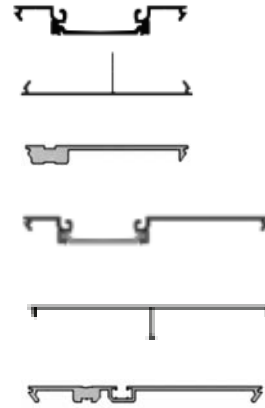

The current defaults are:

- T14000 Vertical Int. - T14445 pocket closure (slotted)
- T24650 Vertical Int. - T14642 pocket closure

The new defaults will be:

- T14000 Vertical Int. - A244040 pocket closure (strut)
- T14000 Head and Sill - P4543A PVC filler
- T14000 Anchor Plates (6") at Head and Jambs - P1130
- T24650 Vertical Int. - A246040 pocket closure (strut)
- T24650 Head and Jambs - P4554 PVC filler
- T24650 Anchor Plates (6") at Head and Jambs - P2460

Retired part:

- T24650 deep pocket closure - T14632

We understand preferences for these configurations vary; therefore, all parts above will be stocked items with identical lead-times.

This change will take effect on <<Monday, May 2, 2017>> and reflected on quoted projects thereafter.

Please contact your client development manager if you have any questions.

As always, we appreciate your business and thank you for your continued support.

Yours truly,

A handwritten signature in cursive script that reads "Mary Avery".
