Effective Date: Refer to items below

Released By: **Greg Hall**

Subject: **400TU Fastener Change**

The following updates have been made to the 400TU Ultra Thermal Curtain Wall system:

- Part number **S439** has been added to Section I2.1 of the Price Book. This is a 1/4-20 x 2 3/4" HWH bolt used to attach MaxBlock sunshade anchor brackets to the vertical mullions.  
EFFECTIVE DATE: FEB 1, 2016
- Part number **S446** has been substituted for the S442. S446 is a 1/4-14 x 4 1/2" Phillips flat head TEK used to attach the corner adaptor to the corner mullion for the 7 3/4" deep back members. This change allows more clearance between the inside face of the glass and the screw head. Details and installation instructions will be revised soon to reflect this change.  
EFFECTIVE DATE: Immediately

The online version of the Price Book will be updated soon to reflect these changes.
