Released By: **T.Trinh/W. Lutzke**

Subject: **A244040 Pocket Closure for use with T14000**

Description:

TU24000 shallow pocket closure A244040 has been tested for use with T14000 Series 2" x 4 1/2" thermally broken storefront for greater Condensation Resistance [CRF] and reduced thermal conduction [Uc].

Test results for AAMA 1503-09 show substantial improvement over the slotted pocket filler design. Please see Test Report E1589.01-116-46-R0 for mockup design and test conditions. CMAST simulations are complete and have been submitted to AAMA for approval.

Uc = 0.34

CRFf = 62

Price Book & Design Manual pages are available on the Tubelite website and updated printed pages are coming soon. The shallow pocket & deep pocket can be ordered now from Price Book Section G3.3 TU24000 with these list prices:

A244040..... \$210

A245050..... \$311
