

Extrusion:

E9080_E9081

System:

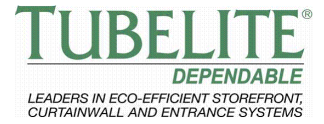

950SG

Typical Use:

SSG Mullion Female_SSG Mullion Male

Alloy:

6063 T6

The following chart is for estimating purposes only. Site specific conditions and frame configurations can have a significant affect on the structural capacity of the framing system. Consult a PE for approval. This frame assumes at least 3 midspan horizontals or antibuckling clips. Maximum vertical spacing between horizontals is 5 feet maximum.
